Vladimir Putin
Kremlin, Moscow
Russia

Dear Vladimir,

Re: Peace Proposal for a better World

Greetings to the President of the largest country on the planet.

It saddens my heart to learn that you are commanding an expedition which involves defacing the earth with your missiles and the atrocities by your troops on human life that are not short of war crimes. Please do not push the World back into the dark ages.

I understand your indifference to human suffering partly owing to your services in the Russian Intelligence and partly due to your heritage; historically clans living in cold northern region such as the Vikings and the Mongols have been very ruthless in their expansion plans, which is very understandable because in the battle for the survival of the fittest they were left with an unfair disadvantage. But humans have evolved to a level that for an existence we can solely rely upon our cerebral cortex without even spending ATP on our muscle tissue. The quality of life has increased so dramatically that people live better life then kings from a century ago.

I beg you to not wage a war against humanity as World War 3 will result in loss of life and resources of such a magnitude that if Russia is a winner, then your win will be akin to Napoleon' invasion of Moscow and if you lose then you will witness your country as you witnessed it during dissolution of the Soviet Union.

You are a great leader and still enjoy popularity of your people, please utilize the resources at your disposal for advancement of humanity rather than contributing to Global Warming. If you hold the theory that there is no Global Warming, please experiment by putting a clear plastic bag over your head and documenting your observation. That is a micro climate change; Science is just experimentation and Observation.

Great Leadership is not in keep fighting an unwinnable battle, but in making Russia better than it was before this war. Please withdraw your troops, allocate your Capital from military expenditure to enhance Russia's GDP and I hope history will be kind to you.

Yours very truly
(Signed electronically)
